

Water Supply Update

Serving the Communities of Hampton, North Hampton, Rye & Stratham

Weather Trends/Outlook

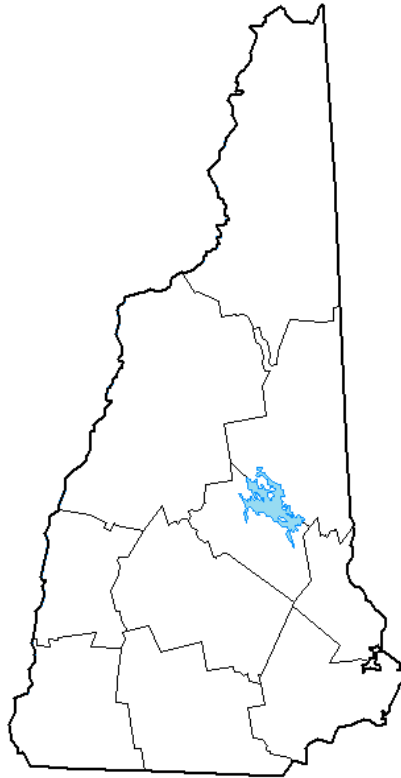

January was much wetter than average. Precipitation totaled 11.7 inches in December; more than three times the long-term average of 3.5 inches. Higher than average precipitation over the past two months has alleviated the last year’s drought conditions. The U.S. Drought Monitor map shows no dry or drought conditions in New Hampshire.

U.S. Drought Monitor New Hampshire

January 31, 2023
(Released Thursday, Feb. 2, 2023)
Valid 7 a.m. EST
